SAUSALITO

# OCEANWAY<sup>®</sup> AUDIO SAUSALITO

After having received such positive responses to our larger speaker systems, we were asked for a design to fit smaller spaces yet still deliver full range accurate reproduction. With that in mind we are excited to introduce Sausalito, the newest member of our high-bandwidth speaker systems. Sausalito represents a new step forward, achieving efficient distortion-free dynamic range in an aesthetically appealing profile. As with all of our systems, Sausalito allows the listener to move around the room and hear the same natural, open and accurate image. It is a highly refined three-way reflex design that incorporates a new midrange and tweeter. The crossover has been updated to accommodate these changes, while the cabinet features a sleeker design to maintain time alignment, reduce baffle reflection and new materials to minimize low frequency resonance. We feel the artistic sophistication of this styling is reminiscent of the California city it was named for.

## **Components:**

Tweeter = 1" fabric dome with ferro fluid cooling and low resonant frequency.

Mid = 8" geometrically reinforced aluminum cone with shorting-ring motor and cast aluminum frame

Woofers = 12" aluminum cone, low distortion triple shorting-ring motor and cast aluminum frame

Crossover freqs = 160Hz & 1850Hz, 3rd order filters

Efficiency = 85db

Crossovers utilize high quality components from Solen, Jantzen, Mundorf and Mills. All components hand matched to 0.1% tolerances for best imaging.

## **Dimensions and Weight:**

each cabinet  
42 inches tall  
16.5 inches wide  
22.75 inches deep  
148 lbs
